

# Obsidian Clipper

## An unofficial clipper

This is an unofficial clipper for [Obsidian](#) that allows you to easily clip a selection to a note in Obsidian. Made by [Joost Plattel](#). This plugin is available as open-source on [Github](#).

At this page you can configure the vault & note to append the clip to. Please test the configuration

Vault name (just the name, like 'obsidian' or 'notes')

Zettelkasten

☒ Clip and create a new note (otherwise the specified note is opened content is appended)

Note to clip to (You can specify the a folder as well, like `notes/{title}-{date}`)

00-0000 - [inbox]/0000 - web clips/{year}-{month}-{day}

Use {date}, {datetime}, {year}, {month}, {day}, {time}, {title} and {zettel} as placeholders

Clipping format(reset)

- [{title}]({url}) - {year}-{month}-{day} @ {time}

Use {clip}, {date}, {datetime}, {year}, {month}, {day}, {time}, {title}, {zettel}, {og:image} and {url} as placeholders

☐ Clip html as markdown (just plain text by default)

Datetime format

YYYY-MM-DD HH:mm:ss

Date format

YYYY-MM-DD

Time format

HH:mm:ss
